EXPERTISE

AI SYSTEMS

LLM and GenAI applications
Agentic workflows
Retrieval and evaluation
AI infrastructure
ML / MLOps fundamentals

CLOUD AND PLATFORM

AWS · Azure · GCP
Kubernetes · Terraform
Serverless · Distributed systems

ENGINEERING

Python · TypeScript
Next.js · Event-driven systems

LANGUAGES

Russian — Native
English — Professional
Spanish — Intermediate

CREDENTIALS

Anthropic Foundations certification
Master's degree, Ulyanovsk State University

PROFILE

AI Platform Engineer with 10+ years of experience building production cloud platforms and AI-powered products. Enterprise expertise across AWS, Azure and GCP, delivering LLM applications and cloud infrastructure from architecture to production.

EXPERIENCE

PLATFORM ENGINEER

2022 — PRESENT

EPAM Systems · Client: KKR

- Architected AWS and Azure platforms running production investment systems, with reusable Terraform modules that standardized multi-cloud provisioning.
- Delivered multi-cloud observability and cost optimization, cutting AWS spend by ~30%.
- Productionized AI-ready infrastructure and Azure OpenAI workloads under enterprise governance.

FOUNDER · PREFERO

2026 — PRESENT

- Built an AI platform that scores how ready e-commerce stores are for AI shopping agents — shipped solo, end to end: research workflows, backend, frontend, infrastructure, deployment.
- Developed production LLM evaluation pipelines that turn evidence and trust signals into actionable product insights.

CTO · VERADATI

2026 — PRESENT

- Architected an evidence-based B2B prospect research platform and built its multi-stage AI pipelines combining retrieval, structured reasoning and LLM synthesis.
- Led deployment strategy and technical delivery for early customer pilots.

CLOUD ENGINEER · ASKBRIAN.AI

2023 — 2025

- Stood up GenAI infrastructure on Vertex AI and Flux, serving LLM workloads in production.
- Ran Kubernetes and cloud infrastructure behind production AI services; owned CI/CD and the migration to private networking with IaC.
- Hardened security (secrets, network policies, RBAC) and the monitoring, alerting and logging stack.

DEVOPS TEAM LEAD

2020 — 2022

Microsoft App Center Test Cloud · Akvelon

- Led the team running a test-automation service on hundreds of physical iOS and Android devices.
- Migrated the platform from AWS EC2 to Azure AKS and monitoring to Azure Data Explorer.

DEVOPS / SRE / LEAD

2018 — 2022

Akvelon and enterprise clients

- Built cloud platforms, CI/CD systems and highly available data services across client environments.

DEVOPS ENGINEER

2015 — 2018

SberTech

- Ran IBM IAM services and CI/CD; developed data-quality analysis, biometric auth and AI ServiceDesk clustering.
